### ELIGIBILITY REQUIREMENTS

#### Eligible applicants

- Applicants with an undergraduate or master's degree  
Health professionals with a valid licence to practice in Québec should apply to one of the following award programs:
  - Master's and Doctoral Training for Applicants With a Professional Degree in human health (see program description)
  - Professional Postgraduate Training in Research (Fellowship) (see program description)
- Canadian citizens or permanent residents domiciled in Québec (as defined in the [Common Rules and Regulations](#), art. 2.1), when the award comes into effect, or by **June 30, 2015**.  
This status must remain in effect for the duration of the award.

#### Terms and regulations

- Must be enrolled in a full-time master's or doctoral program as of **September 30, 2015**.  
Master's awards are intended for applicants who have been enrolled in a master's research program, for **one year or less** as of April 30, 2015.

Ph.D. awards are intended for applicants who have been enrolled in a doctoral research program for **three years or less** as of April 30, 2015.

Students who enroll directly in a doctoral research program after their bachelor's degree must first apply to the master's research program if they are eligible.

The number of enrolment years is calculated based on the date on which the applicant registered for a master's or doctoral program, according to the award sought by the applicant.

Students who suspended their master's or doctoral studies to take parental leave may defer their eligibility period for up to one year.

If an applicant is a handicapped person in accordance with the *Act ensuring handicapped persons their rights for academic, professional and social integration* (L.R.C. chapter E-20-1), the rules pertaining to program registration do not apply. The duration of the award remains 2 years at the master's and 3 years at the Ph.D. level.

Applicants enrolling in a post-master's qualification program in France (Diplôme d'études approfondies, D.E.A. or the equivalent) must apply for master's award.

- **Master's award eligibility:** At the time of applying, the applicant must have earned a grade point average of B+, or the equivalent, in a university undergraduate program.

Only the grades for the degree on which the applicant's admission to the master's or Ph.D. program is based will be considered.

- Must submit a health research project which represents at least 40% of all the credits of the designated program and be supervised by an independent researcher (as defined in the [Common Rules and Regulations](#), Annex 1c)

#### Basic research ethics training

Basic research ethics training is compulsory for all FRQS awardees conducting research projects that involve human subjects.

Research that involves human subjects includes work on :

- living human subjects
- cadavers, human remains, tissues, biological fluids, gametes, embryos or fetuses, cells or genetic materials
- personal information from files that enables a person to be identified.

Awardees must therefore successfully complete levels 1 and 3 of the [On-line Tutorial in Research Ethics](#) developed by the Ministère de la Santé et des Services sociaux.

This training must be completed in the year following the receipt of a confirmation from the FRQS that the award was granted.

The FRQS encourages awardees to follow a one-credit research ethics training course in addition to the compulsory basic research ethics training, whenever possible.

## AWARDS OFFERED IN PARTNERSHIP

The FRQS offers a number of awards in collaboration with partners. The amounts of funding provided by the FRQS and the as well as other funding conditions (i.e. funding period and renewal option) may vary according to the agreements in effect.

Eligible applicants are selected through a three-step process:

1. Applicants must select by priority order, one or more partners whose research areas are in line with the themes of the application in order of preference (see section **Partenariats** [partnerships] on the form).
2. The FRQS will send the partners a list of applications. The partners will assess the

	<p>relevance of the applications based on their interests and research priorities.</p> <p>3. The applications will be assessed by a committee of experts or peers. Applications that obtain a score of at least 70% for scientific excellence and which are relevant to the work of one or more partners may be offered partnership funding.</p> <p>Like all other FRQS awards, the partnership awards are attributed based on merit following a scientific evaluation by a committee of experts or peers.</p>
